Tarek Atwan

Consultant | Instructor | Author | AI Engineering | Machine Learning | Data Science | MLOps | Data Engineering

Amman, Jordan

Summary

I build production-ready software, and I teach others to do the same. Over 20 years across consulting, the software industry, and my own ventures have given me a foundation that is equal parts technical and entrepreneurial. I have launched companies in fitness tech and life sciences, advised global organizations, and delivered data and AI solutions across industries. What keeps me sharp today is still shipping: a mobile app, a SaaS platform, and a self-hosted data tool, all currently in production, built with the same modern AI and coding tools I teach professionally. ' : is a role-based technical screening SaaS for Data, Analytics, and AI hiring teams. It replaces generic skills tests with domain-specific assessments, anti-cheat integrity controls, and a hiring insights engine, on a pay-as-you-go subscription model. is a visual, drag-and-drop time series forecasting platform for data teams. Built on a perpetual license model, it deploys on-premise or on any cloud via Docker, giving teams full control over their data and infrastructure. No vendor lock-in. is an iOS app for serious lifters. It reads Apple Watch biometrics and computes a daily Readiness Score and muscle-by-muscle recovery map, entirely on-device. No cloud. No account. No guesswork. :I am a Pluralsight Elite Instructor (2023, 2024, 2025) and the author of " " (Packt, 2022), now in its second edition (2026) and translated into Japanese. I teach Machine Learning, GenAI, Data Engineering, MLOps, and Time Series Analysis at beginner through advanced levels. My courses are not theoretical. They are built around the same tools and workflows I use to ship production software: cloud-native architectures, LLM integration, modern deployment pipelines, and real data problems. :AI Strategy, Machine Learning and Deep Learning, LLMOps and MLOps, Time Series Forecasting and Anomaly Detection, Data Engineering and Modern Architecture, Cloud Platforms (AWS, Azure, GCP), Big Data and Analytics, Data Governance.: Azure Data Engineer, Azure Data Scientist, Azure AI Engineer, AWS Machine Learning, AWS Cloud Practitioner, Google Digital Cloud Leader, Databricks Developer (Essentials and

Foundations), Apache Airflow, Apache Kafka. If you are looking for AI strategy or training, or wanting to build real things with AI, I would like to connect.

Experience

Ensemble Methods

Executive Advisor and Corporate Trainer

December 2023 - Present (2 years 9 months)

Amman, Jordan

As a highly trusted Independent Advisor with extensive experience in Big Data Modernization, AI/ML, and advanced analytics, I provide strategic guidance that helps government agencies and leading enterprises navigate the complexities of adopting and scaling transformative technologies. I have advised and trained stakeholders across sectors such as Healthcare, Transportation, Cybersecurity, Telecommunications, and Central Banking, delivering impactful seminars on the strategic and ethical implications of AI to keep them informed and future-ready.

What I Offer:

- **Advisory & Strategy Consulting:** Expertise in emerging technologies and proven frameworks to keep organizations innovative.
- **Data & Analytics Excellence:** Proficiency in Data Engineering, Data Science, Machine Learning, AI, Cloud Infrastructure (AWS, Azure, GCP), DataOps, and MLOps.
- **Training & Thought Leadership:** Tailored training programs (including bootcamps) and seminars for industry leaders and government bodies, including cloud-based solutions.
- **R&D and Startup Mentorship:** Guidance for groundbreaking solutions and startup scaling.

Key Accomplishments:

- **Big Data Modernization Advisor:** Led critical Data Lakehouse modernization projects for government entities, including cybersecurity-focused data lakes.
- **Advanced Training Programs:** Developed and led Data Analysis and Data Engineering Bootcamps for Fortune 500 firms (AWS, Azure, and GCP).
- **Generative AI Education:** Delivered workshops on GenAI with tools like LangChain, LLaIndex, LangGraph, and CrewAI.

- AI in Journalism Seminars: Led "Harnessing AI in Journalism: Ethical, Practical, and Transformational Approaches."
- Course Portfolio: Teaching a verity of topics such as GenAI for Business Leaders, AI Engineering Bootcamp, Multi-Agent Systems, and NLP and Computer Vision, Data Engineering with Snowflake and dbt

Atollo Scout

Technology Advisor

May 2015 - Present (11 years 4 months)

Amman, Jordan

TempusFlow.io

Technology Advisor

October 2025 - Present (11 months)

Amman, Jordan

As the CTO of TempusFlow , I am leading the technical vision to simplify one of the most complex areas of data science: time-series forecasting. Drawing on my experience as a time-series author and AI engineer, we are building a visual, drag-and-drop platform that turns production-ready modeling into an intuitive "flow" where no deep Python knowledge is required. While we are currently in active development, our mission is clear: to bridge the gap between advanced temporal analysis and seamless usability for analysts and enterprises alike

RecoveryIQ

Technology Advisor

March 2026 - Present (6 months)

Amman

Creo Technologies

3 years 11 months

Senior Technical Advisor

November 2023 - Present (2 years 10 months)

Amman, Jordan

Provide subject matter expertise in the areas of Generative AI, Machine Learning, Data Science, Data Governance, Cloud Big Data Engineering, Cloud Migration, Cloud AI/ML, and emerging technologies in the data analytics domain.

CTO & Partner

October 2022 - November 2023 (1 year 2 months)

Dubai, United Arab Emirates

Managing Partner & CTO. Responsible for growing Creo's consulting capabilities across data engineering, data science, cloud architecture, MLOps, DataOps, business intelligence, and data governance. Leverage and optimize emerging technologies to democratize data across enterprises.

Creo provides years of experience in democratization data analytics and empowering business users across enterprises. Extensive experience in data modernization through the cloud on AWS and Azure for Data Engineering, MLOps, DataOps, and Analytics.

Pluralsight

Corporate Instructor & Courseware Creator

March 2023 - Present (3 years 6 months)

** 2023, 2024, and 2025 Elite Instructor Award Recipient

As a lead corporate training instructor and content creator, I teach and develop courses spanning Data Analytics, Data Science, Business Data Analysis, Machine Learning, Deep Learning, Generative AI, and Data Visualization & Storytelling. My expertise also covers Data Engineering, Big Data, Project Management, Programming (Python, R, JavaScript, and Rust), and cloud technologies, including Amazon Web Services, Microsoft Azure, and Google Cloud.

I emphasize critical industry concepts such as Big Data strategies, Data Governance frameworks, AI Ethics, and Data Ethics to ensure professionals understand not just the 'how' but the 'why' behind data-driven practices. I design and lead advanced courses, including Generative AI for Business Leaders, AI Engineering Bootcamps, Hands-on Machine Learning, Building Multi-Agent Systems, and Data Engineering with Snowflake and dbt, all tailored for cloud platforms (AWS, Azure, GCP).

My mission is to equip professionals with the knowledge and practical skills needed to navigate and excel in the evolving landscape of data and technology.

Packt

Author

May 2021 - Present (5 years 4 months)

remote

- Best selling author in 2022/2023 for Time Series Analysis
- * Author of "Time Series Analysis in Python Cookbook," published in June 2022 and translated into Japanese in 2023:
Python時系列分析クックブック I –前処理–
Python時系列分析クックブック II –モデル・機械学習–

- Author of "Time Series Analysis in Python Cookbook 2nd Edition" to be published in December 2025.

- * Explore my Amazon Author Page <https://www.amazon.com/author/tatwan>
- * Explore my books on Packt <https://www.packtpub.com/en-us/search?query=Tarek%20A.%20Atwan>
- * Explore the Japanese editions: https://www.asakura.co.jp/detail.php?book_code=12294 and https://www.asakura.co.jp/detail.php?book_code=12295

Topics Covered: My work covers comprehensive topics, including Reading and Writing Time Series Data, Working with Time Series Databases, Exploratory Data Analysis, Handling Missing Data (imputation and interpolation techniques), Change point Detection, Outlier Detection using Statistical Methods and Machine Learning. It also delves into Time Series Analysis & Forecasting using Statistical Models (ARIMA, SARIMA, VAR, Holt-Winter's), Machine Learning (preparing time series data for ML, using Scikit-Learn, Sktime, and Prophet), and Deep Learning (building LSTM, GRU, and RNN models with TensorFlow, PyTorch, and NeuralProphet). Additionally, my work explores handling multiple seasonal patterns using models like UCM (Unobserved Components Model) and more.

Luminus Education Group
Senior Consultant & Advisor
November 2025 - April 2026 (6 months)
Amman, Jordan

As a Senior Consultant & Advisor to Luminus Education Group, I provide strategic guidance on the adoption of Artificial Intelligence and emerging technologies within the education sector. I leverage my background as an industry leader to act as an educator consultant, bringing years of applied, hands-on delivery and "real-world" expertise that extends beyond traditional academia. My mission is to ensure that technology adoption is not just theoretical, but deeply rooted in practical, industry-standard implementation

Correlation One

Lead Instructor - Cybersecurity

June 2025 - September 2025 (4 months)

I am currently leading the Cyber Advance for Women in MENA program, a 20-week intensive training by Correlation One. We're equipping aspiring professionals with a robust cybersecurity skill set, covering everything from the CIA triad and network hardening to advanced enterprise concepts like Incident Response (IR), Vulnerability Management, and Identity & Access Management (IAM). Our mission is to prepare participants for the technical and professional demands of the cybersecurity industry, complete with job placement support.

Correlation One

Lead Instructor - Data Analytics

September 2024 - March 2025 (7 months)

Teaching a comprehensive, hands-on 16-week Data Analytics program to 2,000 fellows. This program equips participants with essential skills in Excel, SQL, Python, Tableau, and Looker. The curriculum spans key areas, including Data Analysis, Data Visualization, and Data Science & Machine Learning, preparing fellows for success in data-driven roles.

Slalom

Senior Delivery Principal - Data and Analytics Practice

April 2021 - September 2022 (1 year 6 months)

Los Angeles, California, United States

Part of the Los Angeles Data & Analytics leadership team acting as a trusted advisor, hands-on, and subject matter expert to clients in Machine Learning, Data Engineering, Data Science, Time Series Analysis & Forecasting, Statistical Modeling, Cloud Modernization (AWS and Azure), DataOps, and MLOps.

Pepperdine Graziadio Business School

Instructor, FinTech & Data Science

April 2021 - July 2022 (1 year 4 months)

Los Angeles County, California, United States

Lead instructor for 2U's FinTech & Data Science Bootcamp at Pepperdine University teaching Algorithmic Trading, Python, Time Series Analysis & Forecasting, Deep Learning with Tensorflow, Machine Learning (supervised and unsupervised), Natural Language Processing, SQL, AWS Redshift, AWS SageMaker, Data Visualization, Blockchain, Solidity, Smart Contracts, Tokens, Cryptocurrency, DeFi, NFT.

Technologies:

Python, Tensorflow, Keras, Shell, AWS, Spark (PySpark), SQL, Blockchain, Solidity, Ethereum, SQLAlchemy.

Thinkful

Data Analytics Educator and Mentor

October 2020 - October 2021 (1 year 1 month)

remote

Mentor and guide students by sharing my industry experience and domain insight in the areas of Data Analytics and Data Science to prepare students for the workforce.

MorganFranklin Consulting

Director, Data & Analytics

May 2019 - April 2021 (2 years)

Greater Los Angeles Area

- Leader within the Information Management & Technology (IM&T) division within MorganFranklin.
- Combine strategy, technology, and data analytics advisory services
- I provide clients with subject matter expertise in the areas of Data Analytics, Machine Learning, Data Engineering, Data Integration, Cloud and Edge Computing, Cloud Data Warehouse, Natural Language Processing, Artificial Intelligence, FinTech, Time Series Analysis, Data Visualization, Application Development (Native and Cross-platform for Web, Mobile, and Desktop), and IT Due Diligence.

Technologies:

Data Analytics & Engineering: Python, R, Airflow, Snowflake, Boomi, Talend, RapidMiner, Dataiku, MongoDB, PostgreSQL, MySQL, Redis, AWS (EC2, RDS, Redshift, SageMaker), Azure, GCP, Tableau, PowerBI, MicroStrategy, Docker, Vagrant, Git, Elasticsearch, Databricks, PySpark

Machine Learning: Python, R, and Julia

Application Development: Jenkins, Git, Docker, Flask, React JS, React Native, Flutter, JavaScript

Arizona State University

Instructor, FinTech & Data Science

June 2020 - December 2020 (7 months)

Phoenix, Arizona, United States

Lead instructor for 2U's FinTech & Data Science Bootcamp at Arizona State University teaching Algorithmic Trading, Python, Time Series Analysis, Deep Learning with Tensorflow, Machine Learning (supervised and unsupervised), Natural Language Processing, SQL, AWS Redshift, AWS SageMaker, Data Visualization, Blockchain, Solidity/Smart Contracts, Tokens, Cryptocurrency.

Technologies:

Python, Tensorflow, Keras, Shell, AWS, Spark (PySpark), SQL, Blockchain, Solidity, Ethereum, SQLAlchemy.

USC Viterbi Data Analytics Boot Camp Affiliated with Trilogy Education Services

Instructor, Data Science and Visualization Bootcamp

August 2019 - March 2020 (8 months)

Greater Los Angeles Area

Lead instructor for 2U's Data Science and Visualization Coding Bootcamp at the University of Southern California, teaching topics that include:

Python (Pandas, Numpy, Matplotlib, Tensorflow, Keras, Seaborn, Beautiful Soup, Flask), HTML/CSS, JavaScript (ES6, D3, Leaflet.js, Plotly.js), APIs, JSON, MySQL/PostgreSQL, MongoDB, R, Tableau, Advanced Statistics, Machine Learning, Deep Learning (TensorFlow), Social Media Mining, Big Data (Hadoop, Spark, Databricks), Cloud AWS and Heroku deployment, SQL, Data Modeling, ETL, Git/Github, Advanced Excel, and VBA.

MicroStrategy

Director, Professional Services (Middle East, India & Africa)

February 2018 - May 2019 (1 year 4 months)

Dubai, United Arab Emirates

- Part of the executive leadership for MicroStrategy in the region.
- Manage the Professional Services division providing consulting services in the Middle East, India, and South Africa regions. Manage P&L and responsible for services growth in the area with a proven track record of Quarter over Quarter growth.
- Grew the region in terms of capabilities, client base, and team members.
- Assist and advise clients with their data analytics and technology innovation strategy.

- Provide hands-on expertise in building advanced data-driven solutions/ products leveraging Data Analytics, Machine Learning, and Data Mining techniques
- Provide subject matter expertise for topics on Advanced Analytics, Machine Learning, Data Science, Data Visualization, Business Intelligence, Python/ R, Application (Web/Mobile) Development, Federated Analytics, Embedded Analytics, and Semantic Graph best practices.

Additionally, I provide technical expertise in the areas of:

MicroStrategy 2019, Data Governance, Solution Architecture, Machine Learning/Deep Learning, Time Series Analysis, Statistical Analysis, Data Visualization, Text Analytics, NLP (Natural Language Processing including the Arabic language), Python, R, Javascript, Data Wrangling, Feature Engineering, Feature Selection, Optimization, Elasticsearch (Search Analytics), SQL, CoAE (Center of Analytics Excellence), Docker, RESTful API, Mobile Development and data-driven application development

North Highland

Director, Data and Analytics

November 2014 - February 2018 (3 years 4 months)

Greater Los Angeles Area

- As a Data Analytics leader within the firm, I provided guidance and strategic advisory to help diversify our data analytics offerings and capabilities. A proven track record of client satisfaction, growth, and delivering significant and innovative data-driven products and solutions.
- Won an award for the most innovative product within the firm.
- At North Highland, I provide subject matter expertise around Data Analytics, Data Mining, Business Intelligence, Data Visualization, Digital Transformation Strategy, Cloud Migration Strategy, Cloud Data Warehousing, Application Development, Mobile Development, DevOps Big Data, and Open Source.
- Passion for solving client pain-points by delivering innovative data-driven products, leveraging emerging technologies from open source to proprietary or custom build.

- I always strive to help my clients by partnering with them and directing my passion for anything tech & digital to provide high-quality consulting services and deliver robust products that scale.

- Additionally, responsible for business development and expanding consulting services within the region.

Areas of expertise:

Product Management, Machine Learning, Data Science, Business Intelligence & Data Warehousing, Big Data, Data Discovery & Data Visualization, Data Integration, Data Engineering, Data Preparation, Data Wrangling and Munging, Data Governance, Data Quality, Web & Mobile Development (React JS, Vue JS, React Native, Redux/Flux, Electron JS), Cloud (Azure, AWS, Google Cloud, IBM Cloud)

Fit Spotting

Co-Founder/ CTO

April 2014 - March 2017 (3 years)

Greater Los Angeles Area

Co-Founder and CTO managing entire process of application development for Fit Spotting. This startup rates hotels around the world based on their fitness amenities and allows users to share their ratings, photos, and reviews regarding the quality of the offering (hotel gyms and fitness amenities).

With a passion for learning new technologies and challenging myself, I took an idea and converted it into a mobile application deployed on the App Store. The app makes it easier for travelers to pick the perfect hotel while traveling without sacrificing their fitness goals.

The application was selected and awarded in 2015 by Facebook to join their FbStart Program.

Fit Spotting application was built using these technology stacks:

- 1) Original Project v1.x: Built the application using Appcelerator/Titanium SDK (JavaScript). The backend was developed using PHP and MySQL. Overall responsibility includes designing the data model, creating a transaction DB in MySQL, loading/extracting external data, creating the API, developing the UI, testing, and deploying to the AppStore.

2) Release v2.x (2015 FbStart Award): The new version was a complete code rewrite. The application was built using Swift (started with Swift 1, then Swift 2) and Xcode. Backend development was done using PHP, MySQL, and Parse/MongoDB (for authentication and handling dynamic schema needs). Wireframing was done using Sketch. Overall responsibility includes designing the data model, data extraction and migration, application storyboard and design, coding, and AppStore deployment.

3) Release v3.0 (In progress-2019 for a new release): The Current application was only released on iOS. And with Facebook shutting down their Parse service earlier in 2017, I am now rewriting the application to support both iOS and Android (AppStore & Google Play) using a new technology stack:

For mobile:

Front-End: Flutter with Dart

Backend: Node/Express, MongoDB (Mongoose), and for API using GraphQL

Guidance Software

Director, Professional Services

January 2014 - November 2014 (11 months)

Greater Los Angeles Area

Managed the Professional Services Group for the West Region, providing consulting services around Data Forensics, eDiscovery, Cyber Security, and Analytics. Assist clients with Incident Response (IR) strategy to combat security breaches and threats, whether internal or external. Advise clients on using Analytics to move from reactive to proactive threat response. Provide Project Management and Change Management advisory services on all implementations.

Responsible for pre-sales and post-sale activities to ensure continuous growth and client expansion. Active during POCs, creating SOWs, contract negotiation, managing client relationships, and managing a team of senior consultants.

TIBCO Spotfire

Professional Services Practice Manager

March 2013 - January 2014 (11 months)

West & South Central Regions

I managed a large territory covering the West Region providing Business Intelligence, Data Mining, Data Discovery, Data Visualization, and Predictive Analytics consulting services to Fortune 1000 clientele.

Directly managed a team of professional consultants program managers and indirectly worked with other resources from various regions and groups, including Data Scientists and Industry Experts (Telecom & Media, Oil & Gas, Pharmaceutical and Life Sciences).

Responsible for P&L, forecasting (revenue, pipeline & bookings), sales revenue, pre-sales support, managing partner relations, covering contract negotiation, and managing third-party contractors. Additionally, duties include writing statements of work proposals and identifying revenue recognition risks and constraints on quarterly bases.

Management role includes hiring and developing a professional services team, conducting performance reviews, assisting with employee career growth, and providing mentoring and guidance.

MicroStrategy, Inc
Manager, Professional Services
April 2010 - March 2013 (3 years)
Southern California

Provided Business Intelligence and Analytics solutions to Fortune 500 clientele in alignment with their short-term and long-term business goals. Directly supervised a team of professional consultants.

Act as a subject matter expert on Business Intelligence, Big Data, Data Visualization, Executive Dashboard development, Mobile Application development, and Analytics. Deliver end-to-end complex projects to help solve business problems and assist clients to become highly competitive leveraging data as a strategy.

Responsible for consultant's utilization, business development, project delivery, and revenue forecasting. Provided hands-on technical development, project management, strategic advisory, business & business consulting as part of the professional services offerings. Management role included hiring talent, quarterly performance evaluation, mentoring, and manage team career path/growth.

Neuro Research Group LLC

Co-Founder/VP of Operations

August 2009 - June 2012 (2 years 11 months)

Managed business operations, product development, and marketing initiatives including online campaigns, event sponsorship, and trade show participation. Led end-to-end product development from inception to distribution. Oversaw supply chain, sourcing, and distribution channels. Drove competitive analysis efforts. Established sales targets and metrics to measure overall success at the product, regional, and market levels. Product development included 4 products: Bulldozer XL500, Defense Armour 24, Neuro Awaken XT, and Neuro Unwind R4.

Key Contributions:

- Co-Founded company and led all daily operations; designed and developed several product releases in U.S. and international market including pre- and post-launch marketing campaigns.
- Establish relationships with vendors, retailers, distributors, and wholesalers across major markets.
- Hired and trained sales representatives and retailers on product positioning techniques, product knowledge, and differentiators.
- Analyzed competitive intelligence on competing products in similar market channels. Establish a brand penetration and recognition strategy. Establish successful online social media campaign strategy.
- Built R&D committee for new product releases. Led all patent and provisional patent filing efforts

CIBER, Inc

Practice Manager

August 2008 - April 2010 (1 year 9 months)

Phoenix, Arizona Area

- Manage Principal and Senior level Consultants for the Business Intelligence practice within the Global Enterprise and Integration Practice. Monitor consultant utilization and activities on regular bases with a goal to improve monthly utilization; assign and monitor pre-sales, training and internal activities.
- Led the Business Intelligence Practice within CIBER with an emphasis on MicroStrategy and SAP Business Objects solution offerings including Business Intelligence Architecture, Data Warehouse Development, Business Intelligence Best Practices and Assessment, Report & Dashboard Development and

Business Intelligence Training. Additionally the practice provided tool agnostic solutions.

- Established Industry Vertical focus within the BI/DW practice. This includes development of POC/POVs, design industry vertical solutions and offerings. Participate in industry specific conventions including HIMSS and NRF.
- Manage and assist in pre-sales and post-sales activities including qualifying prospects, developing RFP responses and SOWs.
- Conduct and lead strategic assessment projects (Current State, Future State, Gap Analysis and Actionable Road Map Development) for major clients in various industries within Business Intelligence, Data Integration, Data Architecture, Data Warehousing, Enterprise Architecture and Master Data Management.
- Work with Marketing to establish strong marketing campaigns and collaterals for the BI/DW practice to highlight our offerings, capabilities and competencies.
- Ability to work with all levels of management at fortune 1000 companies and other large organization. Experience with local on-shore and off-shore consulting services.
- Succeeded in bringing several strategic partnerships from top BI software vendors to the CIBER BI practice to further advance our Business Intelligence competency, capabilities and offerings.

Clients: T-Mobile, Duke Energy, City of Phoenix, Fairfax County, PetsMart, Volvo North America and Rio Tinto Minerals

MicroStrategy, Inc.

Senior Production Consultant

November 2006 - August 2008 (1 year 10 months)

Phoenix, AZ

Assisting clients such as: American Express, McDonald's, Nu Skin Enterprises, Harbor Payments, DHL, InterSources (Hubwoo Services), Diageo and more

- Provide full Business Intelligence consulting services based on the MicroStrategy platform to major fortune 500 clients. Serve in various leading roles including Project Manager, Business Analyst, Data Analyst,

Architect, Data Modeler, ETL Developer and Report Designer. Duties include requirements gathering, directing teams, DW/BI education & training; analyze project performance, stress testing and QA.

- Hands on experience developing MicroStrategy based solutions using MicroStrategy Architect, MicroStrategy Desktop, MicroStrategy Web, MicroStrategy Object Manager, MicroStrategy Administrator, advanced VLDB settings and Enterprise Manager. Involved in creating Schema Objects, Report Objects, Advanced Dashboards, Security Filters and Objects, Intelligent Server Administration, VLDB settings to modify SQL code in addition to migrating MicroStrategy projects between Dev, Test and Prod environments.
- Business Intelligence Lead: Managed and led several complex end-to-end Business Intelligence projects simultaneously, while ensuring timely delivery at every phase. Managed groups of on-site and off-shore resources with various skill sets and leading the teams into successful engagements.
- Business Development: Expand upon opportunities to sell several products including additional software licenses, software upgrades, education and consulting services. Create new opportunities to sell additional consulting services bringing more revenue to the region and improving utilization (billable hours).
- Technologies: Microsoft SQL Server Integration Services (SSIS), Informatica, Pentaho Data Integrator, Talend, Erwin, Oracle 10g/9i, DB2, Teradata, MS Access, MS Excel, MicroStrategy 8.1.1, Narrowcast Server, SAP BW (InfoCubes, Business Explorer/Analyzer), SAP E-Sourcing, Unix, Weka, SPSS 16 and R Language.

Wells Fargo

Senior Business Systems Analyst (Consultant)

September 2006 - December 2006 (4 months)

Phoenix, Arizona Area

- Project Lead for a POC Business Intelligence (Dashboard/Scorecard) implementation. Designed and developed an interactive dashboard/Balanced Scorecard using Crystal Xcelsius. Duties include gathering requirements, reviewing and revising KPIs & Metrics and create full project documentation.
- Technologies: SAP Business Objects XI, Xcelsius, MS Excel, MS Access, MS Project, SAS.

Southwest Kidney Institute
Project Lead/ Business Analyst
March 2006 - December 2006 (10 months)
Tempe, AZ

- Project Lead for a Mobile Patient Billing Solution. Led the project end-to-end to a successful implementation and provide training for physician, finance and IT Support staff by organizing group training sessions and one-on-one sessions.
- Business Intelligence: Work closely with CIO developing sophisticated analytical reports and dashboards for several departments within the healthcare group (Finance, Clinical and Research).
- Assist in customizing the EMR (Electronic Medical Records) systems by adding customized clinical forms and reports based on physician's requirements.
- Analyze systems used by the practice, map business processes and provide creative technology solutions that would improve physician time utilization, better patient health tracking and prevention through Data Integration (ETL), System Integration, OLTP & OLAP Reporting (financial and clinical).
- Hands-on development of advanced predictive models to indicate potential health issues/drug interactions using clinical data.
- Technologies: Oracle 10g/9i, SQL Server 2000, Sql Server DTS, Talend, Progress DB, GE Electronic Medical Records system, MS Solomon, MEL scripting language, Visual Form Editor, SAP Business Objects XI, Crystal Reports (8,9 & 11), Xcelsius, iDashboards, Patient Keeper, MS .NET studio (VB, ASP.NET), MS Mobile SDK, SQL Server Analysis Services, Excel Pivot tables and Pivot charts, Excel OLAP cubes, HL7, FTP, VPN, HTML, CSS, Star UML.

Robert Half Technology
Business Analyst/ Data Analyst (Consultant)
June 2005 - March 2006 (10 months)
Phoenix, Arizona Area

Assisting clients such as: Furniture Values International/Aspen Furniture within Supply Chain Management and Logistics

- Gather and analyze business requirements from several departments including Supply Chain, Logistics, Inventory, Finance and Sales. Review business logic and processes for the manufacturing company to provide business process mapping and re-engineering. Participate in company conventions.
- Project Lead: Create sophisticated predictive models & KPIs (Key Performance Indicators) for calculating Sales Forecast, Purchasing Formula and Inventory Management. Create advanced OLTP and OLAP reports for U.S. & China teams to monitor Inventory, Cargo, UPS Shipments, Purchase Orders, Backorders, Sales and Parts Replacement Program. Including building Data Marts and ETL processes design.
- Capture customer buying habits, customer churn, top selling SKUs and P&L per region. Work with Marketing and Product Development teams to measure success of new product development and product specific campaigns in addition to potential region promotions. Analysis includes working with company CEO, Sales VP and Supply Chain Manager on deciding which existing items to discontinue and which items to enhance.
- Developed sophisticated metrics to measure UPS (United Postal Services) shipment (overseas and local) performance using UPS tracking and flat files. Conduct bi-monthly status reports to discuss improvements, findings and progress with UPS representatives and company CEO.
- Convert several Unix Reports (QAD Mfg internal reports) and Access reports into Business Objects/Crystal Reports. .
- Technologies: QAD Mfg Pro, Unix, Sql Server 2000, Progress DB, MS Access, Sql Server DTS, MS Excel (pivot tables/pivot charts and Macros/VBA), Business Objects XI, Crystal Reports 11, MS Visio and MS Project.

Pearson Education

Database Architect & Curriculum Specialist

March 2005 - June 2005 (4 months)

Mesa, Arizona

- Project Lead: Work on a critical project for developing educational software suitable for school systems covering all levels from 1st grade to 12th grade focusing on Mathematics. Work closely with project sponsors, math and

science specialists, educators, artists and software developers to ensure successful delivery of the project – on time and within budget.

- Architect and design a backend database, including reports and forms for the math department to assist in mining and searching for information from desperate sources (flat files, excel sheets, XML file, and other email attachments).
- Review the math curriculum for the education software. Review documentation and training for the product.
- Create documentations regarding the Database search engine created and Ad-Hoc reports.
- Technologies: MS Access, MS Excel, VBA programming, MS Visio, MS Project, Oracle
